Ad hoc Release

FJH: Weak markets strain 1. HY, moderate improvement, cost measures in 2. HY

The half-year result of FJH AG (ISIN DE0005130108), the consultancy and software company listed in the TecDAX index, was severely affected by the unforeseen persistent reluctance of the insurance sector to invest. Revenues amounted to 35.6 million Euro (2003: 60.2 million Euro), half-year result after tax was -7.7 million Euro (2003: 7.7 million Euro) and EBIT -11.6 million Euro (2003: 12.6 million Euro).

Other than expected and forecast by observers of the industry the cost cutting measures taken by the insurance companies and the continuing uncertainty with regard to the political framework have led to a significant reluctance to invest in IT.

For the second half-year FJH notices a moderate improvement of capacity utilisation compared to the second quarter. This, however, will range below the plan estimate. In response to the changed market situation a comprehensive package of measures was initiated to reduce personnel expenses. This includes a significant reduction of employee capacities. This will cause a one-time expense, but will form the basis for a successful fiscal year 2005.
